Integrating Informatics for Biology and the Bedside

Known Issues for i2b2 Version 1.3

This document outlines issues that are known to be a problem when installing or running version 1.3 of the i2b2 client.

Third Party Software

Apache-tomcat bug: latest version doesn't work with the PM cell.

Apache-tomcat 5.5.27 does not work with the project management cell, version apache-tomcat 5.5.26 is recommended.

Eclipse bug: Mouse events not working in the Macintosh environment.

Mouse events are not working correctly and as a result the yellow highlight box will not appear when a user mousse over the query name or group in the query tool view. This bug only affects Macintosh.

i2b2 Software

PFT plug-in: Early version of plug-in doesn't work with new workbench.

Earlier version of the PFT plug-in is not compatible with the new 1.3 version of the i2b2 workbench. Therefore a new version of the PFT plug-in was created to enable this cell to work with the workbench.

Installing the new 1.3 version of the PFT plug-in is only necessary if you are upgrading the i2b2 workbench to version 1.3. The new version of the PFT plug-in is backwards compatible in that it will work with earlier versions of the i2b2 workbench. The following chart outlines the PFT plug-in/i2b2 workbench compatibility.

PFT plug-in version	i2b2 Workbench version
1.0	1.2; 1.2.1
1.3	1.2; 1.2.1; 1.3
